Trædelene er ubehandlede og **skal** males inden montage.

Stolpefodder medfølger ikke, skal tilkøbes.

Taget er ikke dimensioneret til tungt tag (teglsten).

Vi anbefaler at der lægges tagpap på tag.

Das Multi-Gartenhaus besteht aus einer modularen Bauweise.

Die Konstruktion der modularen Bauweise erfordert es, dass die Pfosten auf Gabel-Pfostenträgern montiert werden müssen, die einbetoniert werden müssen.

Die Pfostenträger sind nicht im Lieferumfang enthalten und müssen separat erworben werden.

Die Dachkonstruktion ist nicht für schwere Dachlösungen (Dachziegel) dimensioniert.

Wir empfehlen daher, dass Dachpappe als Dachlösung verwendet wird.
